**To: Pacific Green Party,  
State Coordinating Committee**

**From: Chuck Fall, Charles Newlin, Suzia Aufderheid, Jack Dresser, Mariah Lueng, Dan Pulju.**

**Re: Application to form of statewide, non-geographical chapter; Green Liberty Caucus, Oregon Chapter, Pacific Green Party of Oregon**

**Summary:**

Green Liberty Caucus founding members seek recognition from SCC as a state-wide, non-geographic chapter. We are a chapter with a mission, please read further for explanation and reason for forming this chapter.

**Foundational principles upon which base our perspective:**

[Bylaws Statement of Principles](#)

The Pacific Green Party recognizes that our society and government are plagued by inequality, militarism, poverty, and pollution. We envision and strive to create a local-based grassroots democracy that will overcome these societal ills.

[Platform of PGP; War and Foreign Policy; Non-Violence](#)

We will work to dismantle the US war machine, including both the military-industrial complex and the global hegemony it expands and maintains. To do this, we must overcome our government's exceptionalism and bring it into compliance with the norms of international law and diplomacy.

Dear SCC,

We the founding members request recognition from the State Coordinating Committee as an official chapter; we request our application be referred to the January 8 Convention for formal ratification.

We are: Green Liberty Caucus, Oregon Chapter; Pacific Green Party.

The Green Liberty Caucus chapter is a non-geographical state wide chapter open to any registered Pacific Green Party member.

Members of this chapter organize as a chapter under the rules and guidelines of the Pacific Green Party. We, the core founders, are all supporting members of the PGP. The Green Liberty Caucus chapter is open to any registered green who feels the call to defend liberty and civil rights and seek accountability for corporate and government malfeasance.

We subscribe to the sentiment in the [essay](#) that outlines the reason and value for a Government Accountability, Transparency and Whistleblower caucus, which begins with the Eisenhower warning about unchecked 'militarism.'" The essay highlights malfeasance that qualify as state crimes against our democracy including events around the Covid pandemic. Unchecked corruption has led to impunity, an egregious expression of unchecked power.

Our mission is to fight for justice, peace and non-violence by calling out militarism and malfeasance, and associated acts of corruption, resist censorship, and advance the Green project as the antidote to the poison of a corrupt power structure that has denied key liberties and produced an ecological catastrophe; it is this emergency that the Liberty Caucus endeavors to address. We are a call for freedom from techno-domination and an emerging digital fascism of collusion between state and corporate agencies.

A preponderance of evidence shows the American Republic housed in Congress, the judiciary and presidency, have become deeply corrupted by Big Money and of late by the Big Pharma Military Industrial Complex. There is a string of malfeasance for which we demand justice.

We accept that the country was stolen, figuratively speaking, by deep state operators tied to the plutocratic elite, when President Kennedy was killed. His assassination was preceded by the rise of the national security state and the military industrial complex. Compounding the loss of Kennedy, the subsequent 1960's assassinations, and the 9/11 events have been crushing blows to our democracy as the power of the national security state increased with each event.

Our job today is to reclaim our republic from a plutocratic oligarchy that solidified its power on November 23, 1963. Had JFK, Malcolm X, MLK and RFK, and members of the Black Panthers not been assassinated, history may well have arced toward justice as Dr. King envisioned. But the arc was broken instead. To correct this we must speak to this terrible truth, and for this we need media.

We recognize that society is divided into a bifurcated media universe, in which mainstream media provides a highly curated flow of information that conditions the popular consciousness to accept the official narratives. To heal this divide, we call for honest, truthful, accurate media that is independent from Big Money interests.

We are skeptical about mainstream media. The CIA ran COINTELPRO program called 'Mockingbird' which involved planting or turning news and commentary and book authors into curators for the official narrative. Alternative media is necessary for gathering the truth.

We stand in solidarity with many non-mainstream media sources. To make sense of what is going on in the world, we apply critical reasoning skills from all available sources and study the evidence. We endeavor to make reasoned judgment and avoid fallacious argument. We aspire for rational analysis of correlations, actual cause, events, coincidences, and curious anomalies to develop understanding and draw conclusions. To make a judgment call, we weigh the facts and

causes and correlations for the preponderance of evidence each situation provides, and by this process make claims and petition our grievances.

Currently, a medical freedom / anti-vaccine mandate movement is building around the world. We are in solidarity with this world wide anti-authoritarian effort, and call on Greens to officially oppose the vaccine mandates as a violation of civil rights, an egregious overreach by state authorities.

We call on fellow Greens to align with the Green Liberty Caucus and resist a plutocratic technocracy that is engineering a Globalist domination of social, economic, and natural life.

A Green Liberty Caucus monitors for corruption by government, non-government, and corporate agencies and seeks accountability, transparency, and protections for whistleblowers as well as independent media. We support the Green Movement by countering the forces of corruption with protest, media actions, public relations campaigns, electing truth leaders to office, and engaging in intersectionality with others to advance consumer boycotts, and local, statewide and national strikes to build integrity into the American republic.

Green party libertarian group forms Liberty Caucus chapter.  
Seeks accountability for malfeasance from government and corporate leaders.

Demands transparency in affairs and protections for whistleblowers.  
Cries 'democracy dies without a free press'; supports independent media.

### **Green Dissident Voice News Media Alert!**

Six supporting members of the Pacific Green Party formed a statewide chapter, calling it the Green Liberty Caucus, Oregon chapter.

Founder Chuck Fall claims using the word "liberty" to highlight the need for accountability is a challenge to the right wing which has largely claimed the mantle of liberty, progressives and leftists eschewing the word, instead making calls for justice.

"But, the right doesn't have a monopoly on the term; liberty is multi-partisan, humanitarian, opposite of authoritarian; it stands for basic constitutional liberties; Greens need to give the idea our spin," said Fall.

Fall claims the Green Movement, and by extension the PGP itself, can increase its number by appealing to Liberty.

"Caucus members, as libertarians, oppose state / corporate domination, especially when it denies freedom. For example, we feel the mandate and Covid policies are unconstitutional. Under this wide umbrella of criticism, and demand for liberty, we end up allies with the Right around medical / health freedom. We can grow the Green Movement in this intersection of ideas," said Fall.

The Green Liberty Caucus gives voice to issues mainstream thinkers are silent about, like resisting 5G, calling out the 9/11 and JFK state

crimes, resisting the mandate, defending whistleblowers.

“There is a divide in the Green Party, that is reflected in society at large, and that is between the skeptical and the not-skeptical; generally speaking, we don’t trust the government,” said Fall. “We don’t accept the official narrative.”

Fall says that on the vaccine mandate, government authorities have suspended ‘informed consent’ by pushing experimental vaccines, and under the cloak of a national security event, they have advanced a fear campaign, stifled early treatment protocols, and coerced the country into taking a vaccine for a virus that came out of a lab.

If following the money is a meaningful adage to impart motive, then the huge profits Big Pharma has raked in is a tell. It shows Big Pharma conducted a land grab by compelling mandatory testing, mandatory vaccines and, most scandalous, denied early treatment protocols using repurposed anti-viral medications. However, the Covid 9/11 gets even worse.

“Most egregious,” said Jack Dresser, the author of an expose on the Covid ‘pandemic,’ “is that the SARSCOV2 did come out of a lab; it has been engineered, the US Government reportedly holds a patent on the gain of function tech used in the spike protein; by definition, it is a bioweapon and, as a penalty, call it justice, for letting the virus out, bio-safety labs levels 3 and 4 need to be shut down around the world and in the US, and the dangerous gain of function work stopped.”

The founding members hail from Ashland to Portland with stops in Eugene and Corvallis areas, “but we want to get members from central and eastern Oregon,” said Fall, showing hope that the Green Liberty Caucus could grow into a national and even international Green Movement.

Members include: **Chuck Fall, Dan Pulju, Charles Newlin, Mariah, Jack Dresser, Suzia Aufderheid.**

The Chapter’s first order of business is the January 8 convention to vote on advancing a request to the Green Party US national

committee to form a Government Accountability Committee that would inform national committee and steering committee members on critical matters regarding government and corporate malfeasance, need for transparency, and protections for whistleblowers.
